Objective

I seek challenging opportunities where I can fully use my skills for the success of the organization.

Experience

- Madhya Pradesh State Electronics and Development corporation Ltd.** 20/02/2023 - Till Date
GIS Executive
3+Years experience in RS & GIS Field . Remote Sensing with specialization in Spatial Analysis, Satellite Imagery Processing, Georeferencing, Digitization and Features Extraction,NDVI Analysis, LULC Mapping, and Environmental Change Assessment,QA/QC Report Creation Using ArcGIS, ArcGIS Pro, QGIS, and ERDAS Imagine.

Education

- M.P Board** 2014
Secondary Education
86.5%
- M.P Board** 2016
Higher Secondary Education (Physics, Chemistry & Math)
87.2%
- M.C.U. Bhopal** 2017
Diploma in Computer Application
64.71%
- Barkatullah University , Bhopal** 2019
B.Sc. in Physics,Chemistry, Math
63.59%
- Barkatullah University, Bhopal** 2022
Masters in Geography
71.10%
- IGNOU** 2025
PG Diploma in Geoinformatics
70.98%

Skills

- Arcgis, Arcgis Pro, Arcgis Enterprises, QGIS, Erdas Imagine, AutoCAD, Google Earth Pro, Microsoft office, Microsoft Excel

Projects

- WEBGIS KHASRA**
Georeferencing (Vector Data)
Worked on georeferencing cadastral (Khasra) maps by aligning scanned land records with real-world coordinate systems. Georeferencing Khasra maps
Vectorization of land parcels.Data Downloading and Uploading on Madhya Pradesh Government Portal.
- MPSEDC Data Updation (POI)**
Performed Quality Assurance (QA) and Quality Control (QC) for Point of Interest (POI) Version 7 data updates under the MPSEDC project. Verification of POI locations and attributes.Identification and correction of incorrect records.Addition of new POIs.Removal of duplicate and inconsistent entries.Ensuring spatial and attribute

accuracy.

- **IGRS- Sampada 2**

GL Data Mapping

Worked on Government Land (GL) data mapping and spatial correction activities for the Sampada 2.0 project. Parcel mapping and validation. Boundary correction. Geometry modification and spatial editing. Updating GIS databases according to revised land records
Ensuring alignment with administrative boundaries.

- **IGRS- Sampada 2.0**

Habitation Change Detection

Conducted habitation and settlement change detection using LISS-IV satellite imagery from 2022 to 2024.

Satellite image interpretation

Multi-temporal image comparison

Settlement extraction and mapping

Change detection analysis Classification and categorization of land cover changes.

- **Land Use Land Cover**

(LULC) – Stream Digitization

Digitized stream networks using high-resolution satellite imagery and updated hydrographic datasets across multiple districts.

Stream network extraction

Digitization of new stream channels

Validation of existing drainage networks

Hydrographic database updating.

- **Land Use Land Cover - Change Detection of Level1**

Performed forest cover and water body change detection analysis using multi temporal image.

Forest cover change mapping

Water body monitoring and assessment

Land cover classification

Environmental and natural resource analysis. LULC Automation – Object-Based Classification

Developed automated workflows for Land Use Land Cover classification using Object-Based Image

Analysis techniques.

Image segmentation

Feature extraction, Accuracy assessment and validation, Image Transformation and Spectral Index Analysis

Performed image enhancement and transformation techniques for vegetation and land cover analysis.

Techniques Used:

NDVI, NDWI, NDBI.

- **Photo Analytics**

Crop Identification and Agricultural Analysis. photo cleaning, Crop Identification and Agricultural Analysis.

- **Drone As A Service**

Feature extraction

GIS integration of drone data. Road Feature Extraction and Digitization

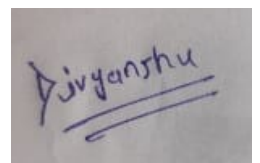

Performed road network extraction and digitization from satellite and drone image. Tree Plantation point mapping.

- **Epco wetland change assessment**

The wetland change assessment was successfully carried out using multi-temporal satellite imagery, GIS techniques, and AI/ML-based object-oriented classification methods. Report Creation Prepared technical reports and GIS map outputs based on project findings and spatial analysis results. GIS map layout preparation .

Achievements & Awards

- M.P SET Qualified

A handwritten signature in blue ink that reads "Divyanshu". The signature is written in a cursive style with a horizontal line underneath the name.
